Murder Mystery – Instructions

A murder was committed last night at the hotel. As Chief Detective Officer, you have to solve the crime.

So far you have collected the names and details of all 32 suspects. The murderer is one of them.

There were five witnesses to the murder. Each has left you one clue to the identity of the murderer.

Each clue was left in a different code so that only you, with your amazing code-breaking skills, will be able to solve them all.

You can tackle the clues in any order. Once you have solved each clue you will be able to eliminate some of the suspects from your enquiries.

Each clue will remove half of the suspects from the list, until you are left with just one...

Who is the murderer?
